16. Please explain your ratings above, especially if you have AI tools for "other" types of work. *

I used AI specifically to explain react concepts and how it would be used in specific problems. As an example I need hooks but I did not understand them so I asked AI to help me write and understand them. I also used AI to summarize both react documentation and API documentation to save time. I also used it to put comments in as that was time consuming and not necessarily a learning opportunity as they were really easy.
